

WATER MANAGER SURVEY

Purpose:

As a manager of water used for agriculture in Utah, you are invited to participate in an online survey about your experience managing water for your company or district in 2021 and 2022.

The responses will be used to learn about:

1. how your district or company responds to drought,
2. your experience, interest, and barriers to water markets, and
3. tools and information needed to improve your water management.

Who should complete the survey:

Anyone who manages water used for agriculture in Utah. This includes anyone involved in managing water with an irrigation company or district - such as board members, directors, president, water master, ditch rider, chairman, engineer, manager, staff, etc.

Time requirement:

The survey is multiple choice and should take about 10-15 minutes to complete.

Consent details:

Your participation in this survey is entirely voluntary and you may terminate the survey at any time if you do not wish to continue. Your answers will be kept anonymous and confidential and released only as summaries - IRB protocol number (12885).

By participating in this survey, you are granting consent to the researchers to use your anonymous responses for the research purposes stated above and for publication of the findings.

Thank you for participating. Please contact matt.yost@usu.edu if you have questions.

The survey can be accessed and completed here:
